

Accounts Payable Processing

Data Dimensions offers a complete solution for electronic processing of supplier invoices for accounts payable processing. Our document processing and management service solution streamlines work processes and provides the basis for increased efficiency and productivity, cost reductions, and enhanced control of business-critical information. We enable you to be free of the paper intensive work of invoice handling, allowing your employees to focus on core competencies.

We deliver our solution via a comprehensive set of services for front-end invoice receiving and imaging/capture of invoice data, invoice exception identification and handling, offering both a hosted A/P workflow automation or supplier portal, and release to ERP, as appropriate. Data Dimensions not only accelerates A/P activities, it completely transforms the entire workflow, moving your A/P functions into the 21st century.

Data Dimensions' A/P web-based, hosted system is configurable without programming, saving you time and money. The simple, rapid deployment and management is accomplished by selecting options from a user-friendly administrative console. This ensures that you become operational in an extremely short time period and future modifications can be made with little or no IT resource requirements.

Outsourcing your accounts payable processing provides you with:

- ▶ Automated workflow for routing, approvals, & customer-specific business rules exceptions, eliminating a paper intensive A/P processing environment
- ▶ A cost-effective, highly flexible & customizable solution, allowing you to enjoy up to 50% savings in current processing costs
- ▶ Data protection, full redundancy, & system availability 24/7
- ▶ Full audit capabilities, ensures transparency
- ▶ Increased regulatory compliance & control, ensuring SOX compliance & transparency
- ▶ Guaranteed data accuracy
- ▶ Simple, rapid deployment, ensuring little to no IT requirements
