

▶ *ddAutoPayer*

ddAutoPayer is Data Dimensions' secure, 100% web-based accounts payable automation service that turns your paper invoices into data.

How does *ddAutoPayer* Work?

- You receive invoices from vendors. Simply scan (or DD scans) the invoices and email to *ddAutoPayer*'s secure Website.
- *ddAutoPayer* processes invoices and:
 - ▶ Captures and verifies the invoice data and images using optical character recognition (OCR).
 - ▶ Validates the invoice data using your company's policies for processing invoices.
- Web-based workflow routes invoice to your staff for review or approval.
- *ddAutoPayer* then creates a secure file that automatically exports to your Accounting/AP/ERP system.
- Meanwhile, you monitor the entire process with *ddAutoPayer*'s robust reporting and audit capabilities.

How much is *ddAutoPayer*?

Processing invoices without *ddAutoPayer* can be slow, difficult, and expensive. Today, it costs some \$12 and requires 20 days to process a single invoice. Our clients typically save 50-80% on every invoice processed with *ddAutoPayer*.

There is absolutely NO upfront investment for hardware, software, or services. All maintenance and support is included in the cost per invoice and you become operational in an extremely short time period.

ddAutopayer provides you with:

- ▶ 50-80% savings on invoice processing costs.
- ▶ A subscription based solution with no upfront payment.
- ▶ A streamlined approach with guaranteed turnaround times, making process cycle times faster.
- ▶ A paper to EDI process - your invoices become transactions in your AP system like EDI.
- ▶ Relief of routine duties, allowing your staff to concentrate on core competencies.
- ▶ Secure remote processing with full auditing & reporting, allowing you room to expand while giving you peace of mind.
- ▶ Simple, rapid deployment, ensuring little to no IT resources needed.
- ▶ An efficient, highly flexible solution, allowing for you to maintain control.
